Forward-looking statement

In this Annual Report, we have disclosed forward-looking information to enable investors to comprehend our business prospects and take informed investment decisions. This report and other statements - written and oral - that we periodically make or publish, contain forward-looking statements that set out anticipated results based on the management's plans and assumptions. We have tried wherever possible to identify such statements by using words such as 'anticipates', 'estimates', 'expects', 'projects', 'intends', 'plans', 'believes', and words of similar substance in connection with any discussion of future performance. We cannot guarantee that these forward-looking statements will be realised, although we believe we have been prudent in our assumptions. The achievement of results is subject to risks, uncertainties, and even inaccurate assumptions. Should known or unknown risks or uncertainties materialise, or should underlying assumptions prove inaccurate, actual results could vary materially from those anticipated, estimated, or projected. Readers should bear this in mind. We undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future events, or otherwise.

ABOUT US

Who we are

We have been providing premium yarns, and premium denim, for nearly six decades to some of the globally renowned domestic and international brands.

We have built trust by manufacturing responsibly and sustainably. | We have built value for our shareholders. | We have built careers for nearly 3000 people. | We have developed 3,000+ high-quality specialized denim variants. | We are rebuilding ourselves, to emerge profitable again.

Established in 1962, we have built our presence across the textile value chain from manufacturing of yarn to denim cloth by building an integrated business model and by leveraging our manufacturing capabilities. We are one of India's leading Original Denim Manufacturers (ODM) associating with renowned international and domestic brands with an enviable market share in the premium denim segment.

Suryalakshmi Cotton Mills Limited, Today

For more than five decades Suryalakshmi has taken everything the world has thrown at it in its stride: the fickleness of changing trends in the fashion industry, the fortunes of boom and recession, the revolving door of bull and bear markets.

But it is no secret the Company got itself into trouble over the last few years. We tackled these issues head-on, and since FY21 we have put together a transformation strategy to turn the Company around. As we began to put the plan in place, the challenges the Company faced were intensified by the onset of the pandemic.

Our vision

To become a global leader and preferred partner in premium yarn and denim fabric manufacturing by leveraging long-term growth opportunities and creating superior value for all stakeholders.

Our mission

To be one of the Top Global Players in the specialized denim and premium yarn sector, bringing inspiration and innovation to every fabric and garment we create.

Integrity

We are committed to remain transparent, honest, and accountable in our relationships with all stakeholders, both on the inside and outside.

Responsibility

We pay attention to what we create, how we create it, and the way it impacts people and the environment.

Where we operate

Headquartered in Telangana, India, and quoted on the Bombay Stock Exchange (BSE) and National Stock Exchange of India Ltd. we have a global sales

sales presence associating with leading private labels, fashion brands, and retail chains. Our unrivaled global reach and footprint serve as one of our competitive advantages.

Our quality assurance

We have successfully driven our business for more than five decades by emphasizing on quality excellence. Our quality excellence is vindicated by certifications such as [], [], and [] and our technologically advanced manufacturing practices.

FROM THE CHAIRMAN'S DESK

Our deep-rooted legacy, brand power, global status, visionary approach, innovation capabilities and commitment to sustainability bolster our leadership position in the industry.

Dear Stakeholders,

As the world approaches the third year since the pandemic, its viral iterations still plague the world with uncertainties. During these humbling times, I'm reminded of all my colleagues and stakeholders who helped us wade through these uncharted waters. I take this opportunity to thank everyone who was with us in our fight against the pandemic or its subsequent waves.

With the worst hopefully behind us, the Indian economy is expected to grow by 8.9 per cent in the fiscal year under review, strongly indicating that economic activity has returned to pre-pandemic levels. High-frequency indicators like passenger traffic and merchandise export seem to hint at the same. Some of the worst-hit sectors like the textile industry, are witnessing rapid recoveries and are expected to grow three-fold in the next four years backed by government initiatives to bolster the same.

The textile sector is extremely important to the Indian economy, since it contributes significantly to export revenues. Post a slowdown to \$75 billion in FY 2021, the domestic textiles and apparels industry is anticipated to be worth \$300 billion by 2025-26, registering a growth of 300 per cent in the next 2 years.

Our Company remained a formidable entity in the textile industry during trying times due to

the resilience of our team. Analogous to the swift recovery of the textile industry in India, our company is witnessing a post-pandemic comeback of its own.

With the consumer confidence gradually increasing proportional to the opening up of the economy, a significant increase in demand was observed in the year under consideration. This demand was fuelled by the recovery of purchasing power and rebound of purchase volumes along with the increase in exports and customer base for our products.

With gradual recovery of demand, we focused on improving our capacity utilisation and addressing the needs of our customers. This was achieved through a number of strategic measures like increasing production capacity and improving overall efficiency of our process and people.

The headwind caused by inflated raw material price was partly absorbed through better capacity utilization which helped limit the increase in operating expenses. The Company has closed down the Power plant that has become unviable to operate due to the high cost of coal and easy availability of low cost grid power. The Company has also substituted coal with biofuel in other operations as a sustainability initiative and also has installed 3001.86 KWP Solar Power

plant at its Amanagallu Division to promote alternative source of energy.

The measures and more importantly, the efforts taken by our company and my colleagues culminated in a good year for Suryalakshmi as demonstrated by our financial performance in the fiscal year 2022.

Our revenue from operations grew by 60 % to Rs. 784 crores in FY 2022. Our persistent focus on operational excellence and cost optimisation has enabled us to turnaround a challenging loss-making year into a profit-making year for the Company. During the year under review, our EBITDA stood at Rs. 90 crores. While, our PBT improved from (loss Rs.0.48 crores) in FY21 to Rs. 49.95 crore in FY22. We also focused on maintain strong balance sheet and liquidity position.

One of the most important assets for sustaining our competitiveness in the ever-evolving textile space is our design thinking and technology innovation. We use state-of-the-art manufacturing systems as well as digital technologies that enable optimal production and efficiency.

Today, Suryalakshmi is moving forward into the future with confident steps. Our deep-rooted legacy, brand power, global status, visionary approach, innovation capabilities and commitment to sustainability bolster our leadership position in the industry.

The credit of our success and turnaround during the year can be attributed to the hard work, dedication and commitment of our employees. We see qualified employees as our most valuable asset. Thus, we adopt a human resources management approach that respects the rights of employees and supports equality and fairness across the organisation. We place great importance on ensuring social gender equality.

Our endeavours of creating impact are not restricted to the numerical targets but extends to developing sustainable products that are innovative and environment friendly. We want our products to be groundbreaking and drive change in the global textile industry.

With the market and our salience improving day after day, we are expecting similar growth in the forthcoming years. I would like to appreciate the unwavering loyalty and support of our customers, employees, shareholders and other stakeholders. We, like always are committed towards expanding our footprint in existing and new markets while delivering the best quality products to our customers.

Regards,

L.N. Agarwal

OPERATIONS

The Operations for the financial year 2021-22 reflect the economic revival in the country following the receding Covid19 pandemic.

The turnover at Rs.783.5Crores has improved by 60% over the previous year and profit before tax of Rs.49.95Crores reflects the improved performance of the spinning and denim fabric divisions. The overall growth in sales volumes and realisations arising out of the favourable market sentiment has contributed to the encouraging results.

POWER PLANT

As informed in the previous report the operations of the Power Plant are discontinued even during this year as it is no longer viable to operate the same due to the shortage and high coal cost and also availability low cost state power.

The Board has decided to dispose off the Power plant and use the sale proceeds to reduce the debt burden.

DIVIDEND

In view of the inadequate profits, the Board regrets its inability to recommend a dividend for the year 2021-22. The Board has decided to dispose off the Power plant and use the sale proceeds to reduce the debt burden.

CAPITAL EXPENDITURE

During the year under review the Company incurred capital expenditure of Rs. 1052.37 lakhs.

EXPORTS

The effects of pandemic subsided resulting in overall revival of the economic activity globally. Exports witnessed a healthy

54% growth and the Company managed to service its clientele of leading brands like Lee, Wrangler, Dickies, Timberland, Wal-Mart, Amazon Gorge, Primark, Salisbury & Jack & Jones etc. The Company has added new customers like CK, Uniqlo, M&S etc & new markets like Indonesia, Syria etc.

FUTURE OUTLOOK

While the performance in the Financial year 2021-22 is encouraging the galloping cotton prices apart from rising other input costs like dyes, chemicals, coal & power etc present a challenge and an opportunity to the Company. The Company will continue to do its best in the given circumstances to meet the evolving challenges.

DIRECTORS

During the year, Smt. Aruna Prasad (DIN: 07164087) Director will retire at the ensuing Annual General Meeting and being eligible, offers herself for reappointment.

During the year IDBI withdraw the nomination of Sri. V.V.S.Ravindra and nominated Sri. Rajan Ravindra Shukla instead. The Board wishes to place on board its appreciation of the continuation made by Sri.V.V.S.Ravindra to the deliberation of the Board during the Tenure.

ANNEXURE V

MANAGEMENT DISCUSSION AND ANALYSIS

Indian Economic Overview

After declining in 2020-21, the Indian economy is predicted to grow by 9.2% in 2021-22, according to preliminary forecasts. This suggests that overall economic activity has recovered to pre-pandemic levels. Despite the fact that the healthcare was substantially impacted, all evidence shows that the “second wave” in Q1 had a far less economic impact than the whole lockdown period in 2020-21.

Total consumption is predicted to grow by 7 percent in 2021-22, with significant contributions from government spending. Gross Fixed Capital Formation also exceeded pre-pandemic levels as a result of increased public infrastructure spending. Both goods and service exports have been very robust so far in 2021-22, but imports have rebounded significantly as a result of increasing local demand and higher international commodity prices. With the vaccination programme reaching the majority of the population, the economy regaining steam, and the predicted long-term benefits of supply-side adjustments in the pipeline, the Indian economy is in excellent shape to grow at 8.0-8.5 percent in 2022-23.

Outlook:

In FY2022-23, India's GDP growth is predicted to be between 7.5 percent and 8.0 percent, and between 6.7 percent and 7.1 percent in FY2023-24. Additionally, because the partial pass-through of higher food and oil prices (with a lag) affects consumers' moods and wallets, it is expected that pent-up demand will pick up with a small delay. Companies will wait for demand signals and cost rises before spending. We expect growth to rise up in the second quarter of FY2022-23 as uncertainties fade.

Indian Textile Industry:

India's domestic clothing and textile sector produces 5% of the country's GDP, 7% of industry output in value terms, and 12% of the country's export revenues. India is the world's sixth largest exporter of textiles and apparel.

India is one of the world's leading producers of cotton and jute. India is also the world's second largest producer of silk, accounting for 95 percent of all hand-woven cloth. The Indian technical textiles market is about \$16 billion, or around 6% of the global market.

The textiles and apparel industry in India is the country's second largest employer, employing 45 million people directly and another 100 million in affiliated businesses.

India's textile and clothing sector is strong throughout the value chain, from fibre to yarn to fabric to clothes. The Indian textile and clothing business is immensely diversified, with segments ranging from traditional handloom, handicrafts, wool, and silk products to India's organised textile industry. Spinning, weaving, processing, and clothing manufacture are all part of India's organised textile industry, which is defined by the use of capital-intensive technology for mass production of textile items.

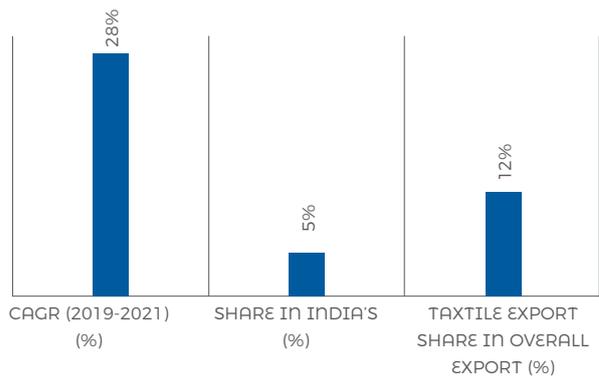

In 2019-20, the domestic textiles and clothing sector generated \$108.5 billion, of which \$75 billion was used domestically and the remainder \$28.4 billion was exported to the global market. From April 2016 to March 2021, Japan, Mauritius, Italy, and Belgium were the top donors of FDI in India's textile sector (including dyed and printed textiles).

Cotton farming employs 5.8 million farmers and 40 to 50 million workers in related industries. Furthermore, the \$75 billion in domestic consumption was split into three categories: clothes (\$55 billion), technical textiles (\$15 billion), and home goods (\$5 billion). While apparel exports were \$12 billion, home textiles exports totaled \$4.8 billion, fabric exports totaled \$4 billion, yarn exports totaled \$3.8 billion, and fibre exports totaled \$1.8 billion and others at \$2 billion.

FDI in India's textiles and apparel industry has reached \$3.9 billion through December 2021. India's textile and clothing exports are predicted to exceed \$100 billion in the next five years, with a CAGR of 11%. Seven major textile parks have been proposed to quadruple the size of India's textile and apparel sector to \$190 billion by 2025-26.

Indian Textile Industry:

Upcoming Trend:

After the oil industry, the textile industry is claimed to be the world's biggest polluter. An expected technical improvement to address this is the addition of Just In Time (JIT) technology, in which garments are made when a consumer screens a sample using Augmented Reality and places an order. This allows customers to choose from a variety of prints, colours, and designs without having to make the garment in the first place, saving time and resources.

The use of big data to market and sell products is another emerging trend in this industry. Customer data, such as purchase habits and location monitoring, will be collected, and an alert SMS will be sent to customers' smartphones if they pass by retail store locations. Visual trial rooms and other new technologies will soon be implemented in the retail business as well.

Another important part that will be employed for betting on the new styles is analytics. Customers will be able to chose which fashions they want to wear in the coming seasons as a result of this. Customers will also be informed about upcoming market trends thanks to this technology. As wearable technology continues to revolutionise the market, the moment has come for smart clothes to make their entrance

Experts anticipate that some odd materials that are not currently in use will be used in the coming years. Sustainable polyester threads, as well as organic and environmentally friendly materials, will be employed in the production of fashion clothes.

It will take another two decades to make wearable technologies available in a country like India. The user will be able to modify the colour and pattern of the clothing based on their needs and moods, as well as change the colour based on the environment or weather outside, thanks to this technology.

In the future, the fashion industry will be more about the experience than the aesthetic. Customers will be more critical of the garment's experience than its appearance, thus brand owners and major market players should be more mindful of their customers. A paradigm change from looks to fashion with lifestyle solutions will occur.

For example, India is currently an average performing market in the global context, yet brands with new technologies from India will soon be seen over the world. India's textile sector is preparing to expand in big ways.

Opportunities:

- **Abundant Availability of Raw Material:** India has a large raw material base, including both natural and synthetic fibres, which has helped it achieve global significance. It is the world's leading cotton producer, accounting for around 27% of global cotton output. In addition, India is the world's second-largest producer of polyester, accounting for 8% of global output. Viscose, another significant textile fibre, is produced in India at third place in the world.
- **Presence of Complete Value Chain:** India is one of the few countries in the world that produces textiles at every stage of the value chain, from fibre to filament to garments and finished goods. On the other hand, Bangladesh, Vietnam, Sri Lanka, Myanmar, Ethiopia, and Cambodia have fragmented value chains, focusing mostly on end-products for other countries for fabric and yarn.
- **Availability of Readymade Infrastructure:** India has a long history of textile and garment manufacturing, with infrastructure scattered throughout the country in various clusters. New virtual clusters in the form of textile and apparel parks are being constructed with help from the Indian central and state governments, in addition to traditional, natural manufacturing clusters. 66 comparable parks have been sponsored by the federal government so far in several states, all of which are in various stages of development.
- **Large and Growing Domestic Market:** In the last decade, India's domestic market has outperformed the world's major consumer regions, such as the United States, the European Union, and Japan, where

demand growth has been restrained by poor economic conditions. India's domestic garment consumption has grown at an annual rate of 11% since 2005. Due to solid fundamentals, India's domestic garment business is expected to reach a value of US\$ 220 billion by 2025.

- **Presence of Large Integrated Players:** The Indian textile sector is distinguished by the presence of large-scale producers along the value chain, from yarn to completed goods. These diversified textile enterprises have considerable manufacturing capacity, are well-known by international buyers, and have conforming set-ups for high-quality goods manufacturing.
- **Availability of Large Pool of Skilled & English Speaking Manpower:** India has the world's largest youth population, with 65 percent of its population under the age of 35. India's demographic dividend will enable it to take the lead as a producer of labor-intensive products like textiles and apparel in the near future. The demand for skilled labour is projected to increase in the near future as a result of a stronger emphasis on quality. As a result, the Indian government has taken a number of efforts to develop a trained workforce.

Indian Denim Industry:

Denim is a durable cotton twill (weave) fabric that is commonly used to make jeans, jackets, shorts, jeggings, and other garments and accessories in the apparel business. It's a robust fabric with diagonal denim ribbing created by weft and warp weaving processes. Denim fabric's resilience comes from the twill weave, which allows it to withstand a lot of friction before breaking down. Other fibres, such as polyester or spandex, are periodically added in small amounts to provide the desired properties.

With new designs, textures, comfort, washes, cuts, and embellishments, the denim business is continually redefining and reinventing itself, keeping consumers intrigued and demand high. The innovation begins with the spinning step, and value is added throughout the supply chain, with fabric playing a significant role. There are around 32 denim fabric factories in India, with production capacities ranging from 10 MMPA to 120 MMPA. Despite the fact that menswear now dominates the industry, other categories are quickly catching up, with ladieswear becoming a focal point. Since a long time, India has been at the forefront of denim fabric manufacturing.

40 million metres per annum
Manufacturing Capacity

Following a slowdown during the lockdown, a surge in denim textile exports has boosted the Indian market, and denim output in mills in manufacturing heartland Gujarat has picked up. Denim is in high demand in key countries like the United States, the United Kingdom, and Europe, resulting in increased orders in Indian companies.

Export orders, in fact, were a lifeline for denim manufacturers, as they helped compensate for a drop in domestic demand from April to June 2021, when the second wave of Covid-19 was at its peak and a series of regulations were put in place to keep the spread in check.

Trade penalties placed by a number of countries on China's Xinjiang province, a textile manufacturing hotspot, are another factor driving up denim orders in India. Reduced textile trade with China, notably in the denim industry, will benefit India. The denim sector was projected to benefit from a decrease of Covid-19 cases in India, as well as the impending festive seasons.

The denim business industry is getting increasingly demanding and competitive, and leading denim fabric manufacturers' appetite for innovation is growing. Despite a slowdown in garment exports and domestic market expansion, India's denim industry continues to grow at a CAGR of 15% to 18% per year. Denim is also the apparel industry's fastest-growing fabric. The current installed capacity of 1200 million is expected to be depleted in the near future to 2000 million meters in next 3 to 4 years, due to huge demand of fabric.

Growth Prospects and Triggers

The main drivers for the increase in the denim sector's market share are:

Purpose: In today's culture, denim may be worn for almost every occasion. It's available in a range of colours and can be worn both formally and casually. Every occasion necessitates a specific type of denim. Because of their versatility, consumers have discovered that buying jeans is more cost effective than buying other bottoms.

Convenience: Denim is a durable, comfortable, and low-maintenance fabric. Denims are less difficult to maintain than formal wear and may be worn for almost any occasion.

Organised Retail Sector and E-Commerce: In the organised retail sector, demand is spurred by an extraordinary increase in the number of shopping malls and the rise of online shopping portals. Because of the ease of ordering

₹ 38265.66 Lacs

Total net revenue during the year (Denim Fabric)

online, the liberal and flexible return policies, and the cash-on-delivery system, Indian youngsters are more likely to purchase denims online.

Prices: Denim comes in a variety of price points to appeal to a wide range of market segments. The price of denim apparel is governed by a number of factors, including the quality of the material, its texture, comfort, cut, and wash. From low-cost everyday jeans to high-end luxury denim, there are denim goods to suit everyone's budget and needs.

Exports: Denim demand is growing at a CAGR of around 6% worldwide. Due to an availability of raw resources, skilled labour, and cutting-edge technology, India has the potential to become a significant denim exporter globally. The rupee's depreciation provides a competitive edge to Indian exporters.

Organised Sector: The growth of the organised retail sector has accelerated the denim industry's pace. Almost every major corporation prefers to source denim fabrics from India.

Target Market: Teenagers, as well as people in their twenties and thirties, used to dress in denim. Denim, on the other hand, has become a popular choice among all ages, from youngsters to the elderly.

Urbanisation of Work Culture: Due to the urbanisation of work culture, denim has recently become recognised as appropriate dress for the job. Denim is being included into the daily work culture of many multinational organisations in order to encourage uniformity and create a more acceptable working environment. Denim demand has risen significantly in India as a result of this. Other businesses have a 'Friday Casual' policy that requires employees to wear jeans at least once a week.

Innovation: Denim is always reinventing itself with new designs, washes, cuts, and embellishments, keeping the masses interested and demand high.

Opportunities:

- According to industry experts, denim is the only textile segment in India with considerable development potential (See chart: India Denim Export Market Overview5). An increasing number of global denim companies are considering India as a new denim export destination due to its high quality requirements, low cost, and large pool of qualified labour.
- Increased disposable incomes, westernisation of work culture, and the consequent rise in the attraction of denim jeans as business casual wear are boosting the

denim wear market on the domestic front. With the rise of globalisation, young Indians are turning to denim as a staple of their daily wardrobe. This expansion is being fuelled by the middle class, just as it is in the great Indian consumer story.

- They favour mid-priced denim, which is characterised by quality, value for money, and a growing styling factor. Denim production and consumption in India have grown at a CAGR of up to 15% over the previous decade, and are expected to continue at similar rates in the next years.
- Denim manufacturers can benefit from a number of factors in India. It is one of the few countries that has a presence throughout the textile value chain, from cotton production to garment manufacturing.
- It has a huge skilled workforce and produces high-quality products at low prices, making it one of the few countries with a presence across the textile value chain, from cotton production to garment production.
- The sector's expansion is aided by the country's demographics, which include rising purchasing power and a modernising fashion sense. In fact, among 30 global emerging economies, India has been rated as one of the finest places to invest in retail.
- The ambitious "Make in India" project will be extremely beneficial to the Indian denim sector. The program's aim has the potential to alter perceptions of the industry and the country's place in the global denim landscape.

Report on Other information other than Financial statements

The Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in the Management Discussion and Analysis, Board's Report including Annexures to Board's Report, Corporate Governance and Shareholder's Information, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard

Management's Responsibility for the Financial Statements:

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these Ind AS financial statements that give a true and fair view

of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the Indian Accounting Standards (Ind AS) prescribed under Section 133 of the Companies Act, 2013 read with relevant rules issued there under and other accounting principles generally accepted in India.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the company and for preventing and detecting the frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors is responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibility for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

ANNEXURE 'B' TO THE INDEPENDENT AUDITORS' REPORT

The Annexure referred to in Paragraph 2(f) under the heading "Report on other Legal and Regulatory Requirements" of our report of even date, to the members of **Surya Lakshmi Cotton Mills Limited** for the year ended 31st March 2022

Report on Internal Financial Controls under clause (i) of sub section 3 of section 143 of the Companies Act,2013 ("the Act")

We have audited the internal financial controls with reference to financial statements of **Surya Lakshmi Cotton Mills Limited** ("the Company") as of 31st March 2022 in conjunction with our audit of the Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls with reference to financial statements

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal financial control with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the "Guidance Note on Audit of Internal Financial Controls over financial reporting" issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act,2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls with reference to financial statements based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and

the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to financial statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system with reference to financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements included obtaining an understanding of internal financial controls with reference to financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system with reference to financial statements

Meaning of Internal Financial Controls with reference to financial statements

A company's internal financial control with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control with reference to financial statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;(2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls with reference to financial statements

Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial control with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls with reference to

financial statements and such internal financial controls with reference to financial statements were operating effectively as at 31st March 2022, based on the internal control with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over financial reporting issued by the Institute of Chartered Accountants of India.

NOTES FORMING PART OF THE FINANCIAL STATEMENTS

for the year ended 31st March, 2022

CORPORATE INFORMATION

Surya Lakshmi Cotton Mills Limited (the 'company') is a public limited company domiciled and incorporated in India under the Companies Act, 1956. The registered office of the company is located at 6th Floor, Surya Towers, 105 S P Road, Secunderabad, Telangana - 500003.

The company was formed in early 1960s as a yarn manufacturing company. It has evolved today as integrated denim & yarn manufacturing textile Company. The company had captive thermal power plant and due to unviability of its operation, the unit was discontinued from February, 2022 in the year under report.

1. SIGNIFICANT ACCOUNTING POLICIES

1.1. Basis of Preparation and Measurement:

Explicit Statement of Compliance with Ind AS:

These financial statements comply in all material aspects with Indian Accounting Standards (Ind AS) notified under section 133 of the Companies Act, 2013 (the Act) and other relevant provisions of the Act.

The financial statements have been prepared on a historical cost basis, except for financial instruments which have been measured at fair value at the end of each reporting period, as explained in the accounting policies mentioned below.

On 2nd February, 2022, the Management of the Company had decided to discontinue the operations of 25 MW Captive Power plant and accordingly, the operating results of the Captive Power plant division for all the periods presented have been regrouped and shown separately under profit/loss from discontinued operations as per Ind AS 105.

1.2. Current Vs Non-current classifications:

All assets and liabilities have been classified as current or non-current as per the Company's normal operating cycle and other criteria set out in the Schedule III (Division II) to the Companies Act, 2013. Based on the nature of products and the time between the acquisition of assets for processing and their realization in cash and cash equivalents, the Company has ascertained its operating cycle as 12 months for current or non-current classification of assets and liabilities.

1.3. Use of Estimates, Judgements and Assumptions:

The preparation of financial statements in conformity with the Ind AS requires management to make certain estimates and assumptions that affect the amounts reported in the financial statements and notes thereto. The management believes that these estimates and assumptions are reasonable and prudent. However, actual results could differ from these estimates. Any revision to accounting estimates is recognized prospectively in the current and future period. The application of Accounting policies that require critical accounting estimates involving complex and subjective judgments and the use of assumptions in these financial statements have been disclosed below:

- Defined benefit obligation.
- Estimation of useful life of Property, Plant and Equipment.
- Estimation of Provisions and Contingent liabilities
- Estimation of Impairment
- Recognition of Deferred taxes

1.4. Significant accounting policies:

1.4.1 Property, plant and equipment

• Measurement at recognition

An item of property, plant and equipment that qualifies as an asset is measured on initial recognition at cost. Following initial recognition, items of property, plant and equipment other than land are carried at their cost less accumulated depreciation and accumulated impairment losses. Freehold land is carried at cost of acquisition.

The cost of an item of property, plant and equipment comprises the purchase price and any cost attributable to bring the asset to its location and working condition for its intended use. Borrowing costs relating to acquisition of property, plant and equipment which take substantial period to get ready for its intended use are also included to the extent they relate to the period till such assets are ready to put to use.

Items such as spare parts, stand-by equipment and servicing equipment that meet the definition of property, plant and equipment are capitalized at cost and depreciated over their useful life.

NOTES FORMING PART OF THE FINANCIAL STATEMENTS

for the year ended 31st March, 2022

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. Costs in nature of repairs and maintenance are recognized in the Statement of Profit and Loss as and when incurred.

- **Capital Work in Progress**

Cost of assets not ready for intended use, as on the Balance Sheet date, is shown as capital work in progress. Advances given towards acquisition of fixed assets outstanding at each Balance Sheet date are disclosed as Other Non-Current Assets.

- **Transition to Ind AS**

On Transition to Ind AS, the Company has elected to continue with the carrying value of all its property, plant and equipment recognized as at 31 March 2016 measured as per previous GAAP and use that carrying value as its deemed cost.

- **Depreciation and amortization methods**

- a) Depreciation is provided on Straight Line Method on the assets, over the useful lives specified in Schedule II to the Companies Act, 2013.
- b) Depreciation on additions is being provided on pro rata basis from the date of such additions. Depreciation on assets sold, discarded or demolished during the year is being provided up to the date on which such assets are sold, discarded or demolished.

- **Impairment**

- a) Assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less cost of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of

assets (cash-generating units).

- b) Reversal of impairment losses recognized in prior years is recorded when there is an indication that the impairment losses recognized for the asset are no longer existing or have decreased.

- **Derecognition**

The carrying amount of an item of property, plant and equipment is derecognized on disposal or when no future economic benefits are expected from its use or disposal. The gain or loss arising from the Derecognition of an item of property, plant and equipment is measured as the difference between the net disposal proceeds and the carrying amount of the item and is recognized in the Statement of Profit and Loss when the item is derecognized.

1.4.2 Intangible Assets:

- **Computer Software**

Computer software is measured on initial recognition at cost. Following initial recognition, software is carried at its cost less accumulated amortization and accumulated impairment losses.

- **Amortization Methods**

The carrying amount of computer software is amortized over the useful life as estimated by the Management which is about 6 years for ERP software and 3 years all other intangible computer software assets.

- **Impairment**

- a) Assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less cost of disposal and value in use.
- b) Reversal of impairment losses recognized in prior years is recorded when there is an indication that the impairment losses

NOTES FORMING PART OF THE FINANCIAL STATEMENTS

for the year ended 31st March, 2022

recognized for the asset are no longer existing or have decreased.

- **Derecognition**

The carrying amount of an intangible asset is derecognized on disposal or when no future economic benefits are expected from its use or disposal. The gain or loss arising from the Derecognition of an intangible asset is measured as the difference between the net disposal proceeds and the carrying amount of the intangible asset and is recognized in the Statement of Profit and Loss when the asset is derecognized.

1.4.3 Borrowing Costs

Borrowing costs to the extent attributable to the acquisition or construction of a qualifying fixed asset are capitalized as part of the cost of such asset till such time the asset is ready for its intended use. All other borrowing costs are recognized as expenses in the Statement of Profit and Loss in the period in which they are incurred. A qualifying asset is an asset that necessarily takes a substantial period of time to get ready for its intended use. Borrowing costs include interest (calculated using Effective Interest Method) and other cost incurred in connection with the borrowing of funds.

1.5. Inventories

Inventories are valued at the lower of cost and net realizable value.

Scrap is valued at Net realizable value.

The cost is computed on weighted average basis.

Cost of inventories comprises cost of purchases and includes all other costs incurred in bringing the inventories to their present location and condition. Cost of work-in-progress and finished goods comprises direct materials, direct labour and an appropriate proportion of variable and fixed overhead expenditure, the latter being allocated based on normal operating capacity.

Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

Spare parts, stand-by equipment and servicing equipment are recognized in accordance with this

IndAS-16 when they meet the definition of Property, Plant and Equipment. Otherwise, such items are classified as inventory.

1.6. Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial Assets

- **Initial recognition and measurement:**

All financial assets are recognized initially at fair value plus, in the case of financial assets other than those recorded at Fair Value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in statement of profit or loss.

- **Subsequent measurement:**

For subsequent measurement, the Company classifies its financial assets into the following categories:

- (i) Amortized cost
- (ii) Fair value through profit and loss (FVTPL)
- (iii) Fair value through other comprehensive income (FVOCI).

- a) **Financial Asset measured at amortized cost**

Financial Assets held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding are measured at amortized cost using effective interest rate (EIR) method. The EIR amortization is recognized as finance income in the statement of Profit & Loss.

The company while applying above criteria has classified all the financial assets (except investments in equity shares) at amortized cost.

NOTES FORMING PART OF THE FINANCIAL STATEMENTS

for the year ended 31st March, 2022

b) Financial Asset measured at fair value through other comprehensive income

Financial assets that are held within a business model whose objective is achieved by both, selling financial assets and collecting contractual cash flows that are solely payments of principal and interest, are subsequently measured at fair value through other comprehensive income. Fair value movements are recognized in the other comprehensive income (OCI). Interest income measured using the EIR method and impairment losses, if any are recognized in the Statement of Profit and Loss. On derecognition, cumulative gain or loss previously recognized in OCI is reclassified from the equity to 'other income' in the Statement of Profit and Loss.

The company while applying above criteria has identified that there are no financial assets that can be classified at fair value through other comprehensive income. However, the company made an election to present fair value changes of investment in equity shares in other comprehensive income as per para 5.7.5 of Ind AS 109.

c) Financial Asset measured at fair value through profit and loss (FVTPL)

Financial Assets are measured at fair value through Profit & Loss if it does not meet the criteria for classification as measured at amortized cost or at FVTOCI. All fair value changes are recognized in the statement of Profit & Loss.

Financial assets are reclassified subsequent to their recognition, if the Company changes its business model for managing those financial assets. Changes in business model are made and applied prospectively from the reclassification date which is the first day of immediately next reporting period following the changes in business model

in accordance with principles laid down under Ind AS 109 – Financial Instruments.

Investments in Equity shares meet the above criteria for measurement at FVTPL. However, the company made an election to present fair value changes of investment in equity shares in other comprehensive income as per para 5.7.5 of Ind AS 109. Dividend on these equity investments are recognised in Statement of Profit and loss when the Company's right to receive payment is established.

• Impairment

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the debt instruments, that are measured at amortized cost e.g., loans, debt securities, deposits, trade receivables and bank balance.

Expected credit loss is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the entity expects to receive.

The management uses a provision matrix to determine the impairment loss on the portfolio of trade and other receivables. Provision matrix is based on its historically observed expected credit loss rates over the expected life of the trade receivables and is adjusted for forward looking estimates.

Expected credit loss allowance or reversal recognized during the period is recognized as income or expense, as the case may be, in the statement of profit and loss. In case of balance sheet, it is shown as reduction from the specific financial asset.

• Derecognition

The Company derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the contractual rights to receive the cash flows from the asset.

Financial Liabilities

NOTES FORMING PART OF THE FINANCIAL STATEMENTS

for the year ended 31st March, 2022

- **Initial Recognition and Measurement**

Financial liabilities are recognized initially at fair value plus any transaction cost that are attributable to the acquisition of the financial liability except financial liabilities at FVTPL that are measured at fair value.

- **Subsequent Measurement**

- a. **Financial liabilities at fair value through profit or loss**

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Gain or losses on liabilities held for trading are recognized in the profit or loss. The Company doesn't designate any financial liability at fair value through profit or loss.

- b. **Financial liabilities at amortized cost**

All financial liabilities of the Company are subsequently measured at amortized cost using the effective interest method. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

- **Derecognition**

A financial liability is derecognized when the obligation specified in the contract is discharged, cancelled or expires.

1.7. Government Grants

The Company has received refundable government loans at below-market rate of interest which are accounted in accordance with the recognition and measurement principles of Ind AS 109, 'Financial Instruments'. The benefit of below-market rate of interest is measured as the difference between the initial carrying value of loan determined in accordance with Ind AS 109 and the proceeds received. Income from such benefit is recognized on a systematic basis over the period of the loan during which the Company recognizes interest expense corresponding to such loans.

The company has retained sales tax collected from

customers under a scheme of deferral of sales tax and to be repaid, without interest, after a specified period and that retained amount is considered as unsecured loan. The benefit of Zero rate of interest is measured as the difference between the initial carrying value of the said loan amount determined in accordance with IndAS 109 and the amount collected and retained. Income from such benefit is recognized on a systematic basis over the period of the said loan during which the Company recognizes interest expense corresponding to such loans.

1.8. Revenue Recognition

- **Revenue from Sale of goods and services**

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration entitled in exchange for those goods or services. The Company is generally the principal as it typically controls the goods or services before transferring them to the customer.

Generally, control is transferred upon shipment of goods to the customer or when the goods is made available to the customer, provided transfer of title to the customer occurs and the Company has not retained any significant risks of ownership or future obligations with respect to the goods shipped.

Revenue from rendering of services is recognised over time by measuring the progress towards complete satisfaction of performance obligations at the reporting period.

Revenue is measured at the amount of consideration which the Company expects to be entitled to in exchange for transferring distinct goods or services to a customer as specified in the contract, excluding amounts collected on behalf of third parties (for example taxes and duties collected on behalf of the government). Consideration is generally due upon satisfaction of performance obligations and a receivable is recognised when it becomes unconditional.

The Company does not adjust short-term advances received from the customer for the effects of significant financing component if it is expected at the contract inception that the promised good or service will be transferred to the customer within a period of one year.

NOTES FORMING PART OF THE FINANCIAL STATEMENTS

for the year ended 31st March, 2022

- **Contract Balances**

Trade Receivables

A receivable represents the Company's right to an amount of consideration that is unconditional.

Contract Liabilities

A contract liability is the obligation to transfer goods or services to a customer for which the Company has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Company transfers goods or services to the customer, a contract liability is recognised when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the Company performs under the contract.

- **Interest / Dividend**

Interest Income is recognized using the Effective interest rate (EIR) method. Dividend income is recognized when right to receive is established.

1.9. Leases

The Company, as a lessee, recognises a right-of-use asset and a lease liability for its leasing arrangements, if the contract conveys the right to control the use of an identified asset.

The contract conveys the right to control the use of an identified asset, if it involves the use of an identified asset and the Company has substantially all of the economic benefits from use of the asset and has right to direct the use of the identified asset. The cost of the right-of-use asset shall comprise of the amount of the initial measurement of the lease liability adjusted for any lease payments made at or before the commencement date plus any initial direct costs incurred. The right-of-use assets is subsequently measured at cost less any accumulated depreciation, accumulated impairment losses, if any and adjusted for any remeasurement of the lease liability. The right-of-use assets is depreciated using the straight-line method from the commencement date over the shorter of lease term or useful life of right-of-use asset.

The Company measures the lease liability at the present value of the lease payments that are not paid at the commencement date of the lease. The lease payments are discounted using the interest rate implicit in the lease, if that rate can be readily determined. If that rate cannot be readily determined, the Company uses incremental borrowing rate.

For short-term and low value leases, the Company recognises the lease payments as an operating expense on a straight-line basis over the lease term.

1.10. Prior period items

In case prior period adjustments are material in nature the Company prepares the restated financial statement as required under Ind AS 8 - "Accounting Policies, Changes in Accounting Estimates and Errors". Immaterial items pertaining to prior periods are shown under respective items in the Statement of Profit and Loss.

1.11. Non-current assets Held for sale and Discontinued Operations

- **Non-current Assets Held for Sales**

Non-current assets are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use and sale is considered highly probable.

A sale is considered as highly probable when decision has been made to sell, assets are available for immediate sale in its present condition, assets are being actively marketed and sale has been agreed or is expected to be concluded within 12 months of the date of classification.

Non-current assets held for sale are neither depreciated nor amortised. Assets and liabilities classified as held for sale are measured at the lower of their carrying amount and fair value less cost of sale and are presented separately in the Balance Sheet.

- **Discontinued Operations**

A discontinued operation is a component of an entity that either has been disposed of, or is classified as held for sale, and

NOTES FORMING PART OF THE FINANCIAL STATEMENTS

for the year ended 31st March, 2022

- (a) represents a separate major line of business or geographical area of operations,
- (b) is part of a single co-ordinated plan to dispose of a separate major line of business or geographical area of operations or
- (c) is a subsidiary acquired exclusively with a view to resale.

The results of discontinued operations that relate to all operations that have been discontinued by the end of the reporting period for the latest period presented are presented separately in the statement of profit and loss under "profit/loss from discontinued operations". This presentation is made for all the periods presented.

1.11.1. Cash and Cash equivalents

Cash and cash equivalents include cash on hand and at bank, deposits held at call with banks, other short term highly liquid investments with original maturities of three months or less that are readily convertible to a known amount of cash which are subject to an insignificant risk of changes in value and are held for meeting short-term cash commitments.

For the Statement of Cash Flows, cash and cash equivalents consists of short term deposits, as defined above, net of outstanding bank overdraft as they are being considered as integral part of the Company's cash management.

1.12. Income taxes

Income tax expense for the year comprises of current tax and deferred tax. It is recognized in the Statement of Profit and Loss except to the extent it relates to a business combination or to an item which is recognized directly in equity or in other comprehensive income.

Current tax is the expected tax payable/receivable on the taxable income/ loss for the year using applicable tax rates at the Balance Sheet date, and any adjustment to taxes in respect of previous years. Interest / expenses and penalties, if any, related to income tax are included in current tax expense.

Deferred tax is recognized in respect of temporary differences between the carrying amount of assets

and liabilities for financial reporting purposes and the corresponding amounts used for taxation purposes using tax rates enacted, or substantively enacted, by the end of the reporting period.

Deferred tax assets are recognised to the extent it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax losses can be utilised. Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The carrying amount of Deferred tax liabilities and assets are reviewed at the end of each reporting period.

1.13. Provisions and contingent liabilities

Provisions are recognized when there is a present legal or constructive obligation that can be estimated reliably, as a result of a past event, when it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of economic resources will be required to settle the obligation, the provisions are reversed. Where the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability. When discounting is used, the increase in the provisions due to the passage of time is recognized as a finance cost.

Contingent Liabilities

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made.

NOTES FORMING PART OF THE FINANCIAL STATEMENTS

for the year ended 31st March, 2022

1.14. Earnings per share

The Company presents basic and diluted earnings per share ("EPS") data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the period. Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding for the effects of all dilutive potential ordinary shares, which includes all stock options granted to employees.

1.15. Foreign Currency transactions

- **Functional and Reporting Currency:**

The Company's functional and reporting currency is Indian National Rupee

- **Initial Recognition:**

Foreign currency transactions are recorded in the reporting currency, by applying to the foreign currency amounts the exchange rate between the reporting currency and the foreign currency at the date of the transaction.

- **Conversion on reporting date:**

Foreign currency monetary items are reported using the closing rate. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions.

- **Exchange Differences:**

Exchange difference arising on the settlement of monetary items or on reporting monetary items of Company at rates different from those at which they were initially recorded during the year or reported in previous financial statements are recognized as income or as expenses in the year in which they arise.

1.16. Employee Benefits

- **Short-Term Employee Benefits**

The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees are recognised as an expense during the period when the employees render the services.

- **Post-Employment Benefits**

Defined Contribution Plan

Employer's contribution to Provident Fund/ Employee State Insurance which is in the nature of defined contribution scheme is expensed off when the contributions to the respective funds are due. There are no other obligations other than the contribution payable to the fund.

Defined Benefit Plan

- a. **Gratuity and compensated absences**

Gratuity and compensated absences are in the nature of defined benefit obligations. These are provided based on independent actuarial valuation on projected unit credit method made at the end of each reporting period as per the requirements of Ind AS 19 "Employee Benefits". Actuarial gain/ (loss) in the valuation are recognized as other comprehensive income for the period.

1.17. Dividends

Annual dividend distribution to the shareholders is recognized as a liability in the period in which the dividend is approved by the shareholders. Any interim dividend paid is recognized on approval by Board of Directors. Dividend payable is recognized directly in equity.

1.18. Recent Accounting Pronouncement

There are no accounting standards that are issued but are not effective as of the Balance Sheet date.

35.5.7 Financial Instruments

The following table provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value, grouped into level 1 to level 3 as described below.

Level 1 - Quoted prices in an active market:

This level of hierarchy includes financial assets that are measured by reference to quoted prices (unadjusted) in active markets for identical assets or liabilities. This category consists of Listed Equity shares.

Level 2 - Valuation techniques with observable inputs:

This level of hierarchy includes financial assets and liabilities, measured using inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).

Level 3 - Valuation techniques with significant unobservable inputs:

This level of hierarchy includes financial assets and liabilities measured using inputs that are not based on observable market (unobservable inputs). Fair values are determined in whole or in part, using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instrument nor are they based on available market data.

35.5.8 Financial Risk Management Objectives and Policies

The company is exposed to financial risks arising from its operations and the use of financial instruments. The key financial risks include interest rate risk, foreign currency risk, market risk, credit risk and liquidity risk. The company has a risk management policy which not only covers the foreign exchange risks, but also other risks associated with the financial assets and liabilities such as interest rate risks and credit risks. The risk management framework aims to:

1. Create a stable business planning environment by reducing the impact of currency and interest rate fluctuations on the company's business plan.
2. Achieve greater predictability to earnings by determining the financial value of the expected earnings in advance.

The following sections provide the details regarding the Company's exposure to the financial risks associated with financial instruments held in the ordinary course of business and the objectives policies and processes for the management of these risks.

(i) Market Risk:

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market prices comprise three types of risk, currency rate risk, interest rate risk and other price risks such as equity risk. Financial instruments affected by market risk include investments in equity shares.

a. Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of the Company and the Company's financial instruments will fluctuate because of changes in market interest rates. Since the Company has only fixed interest-bearing debts, exposure to interest rate risk is minimal.

b. Foreign Currency Risk

Currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates. Currency risk arises when transactions are denominated in foreign currencies.

The Company has transactional currency exposures arising from goods supplied or received that are denominated in a currency other than the functional currency. The foreign currencies in which these transactions are denominated are mainly in US Dollars (\$). The Company's trade receivable and trade payable balances at the end of the reporting period have similar exposures.

The following table demonstrates the sensitivity in the USD to the Indian Rupee with all other variables held constant. The impact on the company's profit before tax due to changes in the fair value of monetary assets and liabilities is given below:

(All amounts in ₹ lakhs, unless otherwise stated)

Particulars	Change in Rate	For the year ended 31st March 2022	For the year ended 31st March 2021
USD	+ 0.50%	(14.59)	(7.50)
	- 0.50%	14.59	7.50

c. Other price risk

Other price risk is the risk that the fair value or future cash flows of the Company's financial instruments will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk) whether those changes are caused by factors specific to the individual financial instrument or its issuer or by factors affecting all similar financial instruments traded in the market.

35.5.8 Financial Risk Management Objectives and Policies (Contd...)

(i) Market Risk: (Contd...)

c. Other price risk (Contd...)

The Company is exposed to price risk arising mainly from investments in Equity shares recognized at FVTOCI.

Sensitivity analysis of 1% change in price of security as on reporting date.

(All amounts in ₹ lakhs, unless otherwise stated)

Particulars	Impact on Profit & Loss		Impact on OCI

Listed Equity shares (1% change in price)	nil	nil	0.16	0.08
Total	nil	nil	0.16	0.08

(ii) Credit Risk:

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The credit risk arises from its operation activity primarily from trade receivable and from its financial activity. Customer credit risk is controlled by analysis of credit limit and credit worthiness of the customer on a continuous basis to whom the credit has been granted.

Long outstanding receivable from customer are regularly monitored. The maximum exposure to credit risk at the reporting date is the carrying value of trade and other receivable.

(iii) Liquidity Risk:

The risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

The company ensures that it has sufficient cash on demand to meet expected operational demands including the servicing of financial obligations; this excludes the potential impact of extreme circumstances that cannot reasonably be predicted.

The table below summarizes the maturity profile of the Company's financial liabilities based on contractual undiscounted payments:

35.5.9 Operating Segments

Factors used to identify the reportable segments

The company's operating segments are established on the basis of those components of the company that are evaluated regularly by the Chairman & Managing Director (the 'Chief Operating Decision Maker' as defined in Ind AS 108 - 'Operating Segments'), in deciding how to allocate resources and in assessing performance. These have been identified taking into account nature of products and services, the differing risks and returns and the internal business reporting systems.

The company has three principal operating and reporting segments; viz. Spinning, Denim (Fabrics) and Power Plant.

The accounting policies adopted for segment reporting are in line with the accounting policy of the Company with following additional policies for segment reporting.

- Revenue and Expenses have been identified to a segment on the basis of relationship to operating activities of the segment. Revenue and Expenses which relate to enterprise as a whole and are not allocable to a segment on reasonable basis have been disclosed as "Unallocated".
- Segment Assets and Segment Liabilities represent Assets and Liabilities in respective segments. Investments, tax related assets and other assets and liabilities that cannot be allocated to a segment on reasonable basis have been disclosed as "Unallocated".

35.5.10 Leases

First time Adoption w.e.f. 1st April 2019:

The Company has adopted Ind AS 116 'Leases' effective April 1, 2019 and applied the Standard to its leases. Therefore, additions at note 2 includes recognition of leasing arrangement towards Land (Amaravati) ₹ 571.87 lakhs. Non factory Buildings as Right-of-use (ROU) Assets of ₹ 49.62 lakhs and a Lease Liability of ₹ 49.62 lakhs as at April 1, 2019. Prior to April 1, 2019, the upfront lease amounts paid was presented under "Other non current assets - Prepaid Lease Rent" in Balance Sheet and amortized over the lease term of 95 years.

The company has elected, as per para C5(b) of Ind AS 116, to apply this Standard to its leases retrospectively with the cumulative effect of initially applying the Standard recognised at the date of initial application. On initial application, the company used the weighted average lessee's incremental borrowing rate (9%) for recognition of lease liabilities.

The company takes on lease premises (offices/godowns) for operations and storage purposes. Accordingly, the Company recognises a right-of-use asset and a lease liability for its leases, if the contract conveys the right to control the use of an identified asset.
